

Water Type Mold Temperature Controller

中文

Water Type Mold Temperature Controller

TTW

● 特点 Features

- Compact design, small size, easy to install
- High efficiency, energy saving up to 35%
- High accuracy, temperature accuracy ± 0.1
- High reliability, 304 stainless steel
- High safety, perfect safety protection and error indication display which are easy maintained and repaired even without professionals can do it
- High quality, imported hi-class parts with long service life
- High speed, rapid heating and cool down speeds lead temperature to be kept precisely and stably with accuracy up to ± 0.1
- High adaptability, unique heating design are suitable to different temperature control application with excellent & distinct power saving
- High durability, 304 stainless steel integrated pipelines with less pipe resistance and even heating for long service life
- High safety, automatic air-exhausting function after startup
- High efficiency, air blowing and return water function

Practical Now

Patent for structure of cooler

Patent No. ZL 201120345120.4

Safety Protecting and Indiction System

Multi-purpose water type mold temperature controller

Options
